Arsh Abbas

B.Sc. Biotechnology Student

arshabbas.edu@gmail.com | github.com/arshabbas8

PROFILE

First-year Biotechnology student with pathology laboratory experience and a developing skill set in Python and data analysis. Interested in genetics, artificial intelligence and scientific communication, with the goal of building a career where biology and technology overlap.

EDUCATION

B.Sc. Biotechnology — Noida International University
Pursuing, first year

EXPERIENCE

Pathology Laboratory

- Gained practical familiarity with sample handling and laboratory safety practices
- Observed routine laboratory workflow and reporting

PROJECTS

- **Voice Assistant** (in progress): Python assistant for hands-free control of a laptop and phone, including unlocking, texting, web search and a personal database
- **GeneLens**: DNA sequence analysis toolkit in Python (GC content, reverse complement, open reading frames)
- **Expression Explorer**: gene expression visualisation with heatmaps and volcano plots from public datasets

SKILLS

Laboratory: sample handling, microscopy basics, aseptic technique, lab safety, record keeping
Computational: Python, Pandas, Matplotlib, bioinformatics basics, Git and GitHub
Creative: video editing, graphic design, scientific visuals

INTERESTS

Genetics, artificial intelligence, bioinformatics, design
